ALMIGHTY BASS FUZZ

Thank you for purchasing your new Daredevil pedal. All hand built in Chicago, IL.

The Almighty Bass Fuzz is an original design circuit, not a variation of some other pedal. The gain is biting and thick, with enough tonal options to cover a lot of ground. Great for blending with your d.i. signal or stacking with your normal amp gain. There is a lot of volume and gain on tap, tear it up!

VOLUME - master level of pedal

GAIN - controls amount of Fuzz

TONE - contours between a scooped mids EQ turned CCW, and full range with boosted upper mids turned CW.

Your effect is designed to run on a 9V DC power source, negative pin (ground). This pedal is true bypass.

For best performance of your effect, use a high quality isolated power source. Any individual wall plug or non-grounded power adaptors may cause unwanted noise.

Warranty info - Inquire with your dealer for their policies on repairs or returns. Daredevil Pedals offers a 2 yr warranty on mechanical parts that are not the result of misuse, modding, or failed repairs by a third party. For further questions or details, you can contact us at [Daredevilpedals@gmail](mailto:Daredevilpedals@gmail.com)
