

WESTMINSTER EFFECTS PINK TREBLE BOOSTER

HOW DOES IT WORK?

Boost - Controls the output volume.

Gain - Controls the amount of gain in the circuit.

Range - Controls the frequencies boosted. Turn it all the way clockwise for a traditional treble booster response. Rolling this knob counterclockwise will introduce more, lower frequencies.

POWER REQUIREMENTS

9V Center Negative - Using anything else will ruin your pedal and void the warranty. Consumes 33mA.

WARRANTY

All Westminster Effects carry a limited lifetime warranty for pedals sold within the United States and a one-year warranty for pedals sold internationally, for workmanship and components. The warranty does not cover misuse or damage due to accidents. Tampering with components such as trimpots voids the warranty.
